

RUGGED *SPLIT*

37 Ton Log Splitter

Are you tired of borrowing your neighbor's splitter or renting? Frustrated by under-sized machines that can't split those tough logs? The Wedge RUGGEDSPLIT hydraulic log splitter is fast, powerful, and reliable. It features commercial grade design and construction at a price the average homeowner can afford, offering an **outstanding value!**

- 37 Tons of Force
- 14 Second Cycle Time
- 9hp OHV Engine
- 16GPM 2-Stage Pump
- 5-Inch Welded Cylinder
- Auto-Return Valve

RUGGEDSPLIT LOG SPLITTERS ARE... WELL, RUGGED!

The RUGGEDSPLIT is designed and manufactured to run all day, every day. Strict quality control and testing at the factory ensure reliable operation. The RS37-09P-24V features a large 5 inch cylinder for power and a steel I-beam frame for rigidity. The durable 9 horsepower OHV engine starts easily and sips fuel, and a low-oil sensor can automatically stop the engine to protect your investment. Combined with a precision engineered 16GPM Hi/Low gear pump, the RUGGEDSPLIT can split cord after cord of even the hardest, knottiest wood up to 24.5 inches in length.

The 4-way Log Stripper is a handy option: When large, green logs get stuck on the blade, the stripper pushes them off during the retract stroke. We over-engineered it out of welded steel plate based on feedback gathered over years of selling splitters.

All hardware is included: hoses, fittings, pre-filter, safety chains, wheels with real taper roller bearings, pump mount, and a jaw coupler. The frame and most components are powder-coated for durability. We stock all parts and offer technical support to keep you up and running.

SAFE AND CONVENIENT OPERATION

- The valve's central location allows convenient operation from both sides of the splitter.
- The operator must hold the valve lever in the forward position to extend the rod and split a log. To retract the rod, the operator simply shifts the lever into the "return" detent and releases it. When the piston is fully retracted, the valve will automatically "kick-off" into the idle position. This leaves the operator free to load the next log.
- The frame is well-balanced for easy maneuvering, and it sits high to reduce back strain.
- The RS37-09P-24V lifts easily into vertical position, so you don't have to lift over-sized logs.
- Folding support legs provide a stable platform and lock into the upright position for towing.

Reliable 9hp OHV Engine
(w/ optional electric start)

Precision machined 16GPM
Hi/Low gear pump

Heavy duty log stripper
increases speed and
convenience

RUGGED **SPLIT**

Optional 4-way wedge doubles efficiency

Heavy duty welded 5" cylinder with 24" stroke

Single spool valve with auto-kick-off detent

Log cradle hold logs securely in place

8-inch wheels with taper roller bearings and fenders

Tow hitch for standard 2-inch ball (safety chains included)

Self-locking pin holds beam in horizontal position

Eight gallon tank with pre-filter & vented cap with dipstick

TECHNICAL SPECIFICATIONS

Model	RS37-09P-24V
Splitting Force	37 tons
Engine	9hp (270cc) OHV gasoline engine with pull-start; EPA-approved; available w/ CARB
Pump	16 GPM; 2-Stage (Hi/Low); incl. jaw coupler
Valve	3-position detent valve with auto-return
Cycle Time	14 seconds (approx.)
Hydraulic Capacity	8 gallons
Hydraulic Fluid	AW-32, 10W or ATF Dextron III
Max Log Length	24-1/2"
Cylinder Dimensions	5" diameter (bore) x 24" stroke with 2" rod
Configuration	Vertical/Horizontal
Shipping Weight	675 lbs
Standard Equipment	8-inch wheels w/ taper roller bearings; fenders; trailer hitch (2-inch ball); safety chains; vented hydraulic tank cap w/ dipstick; grease fittings on wedge; all fittings and hoses
Optional Equipment	Wings for 4-way wedge; 4-way log stripper; electric start

We sell direct to end-users all over the United States and Canada. Most orders ship within 24 hours and arrive within 3-5 days. If you are a retailer, call us about wholesale pricing – put the 37 ton log splitter with the best value in your lineup. For more information, please call us at **1-800-266-1291**, send e-mail to info@ruggedsplit.com, or visit us on-line at www.ruggedsplit.com.
